CASE STUDY

ENTERPRISE REPORTING FRAMEWORK

California State Teachers' Retirement System
standardized its enterprise reporting framework
and created high quality reports leveraging
R Systems' Enterprise Reporting solutions.

Problem Statement

CalSTRS Technology Services (TS) Branch did not have an Application Reports Developer and this hampered their ability to create high quality reports in order to meet various business needs.

Business Need

An Application Reports Developer that can help in establishing, standardizing, and maturing enterprise reporting framework.

Solution Approach

- Key technology provider for the development and implementation of enterprise reporting framework including tools, platforms, methodologies, processes, and best practices
- Application Reports Developer solution included use of SQL queries, reporting tools, MS development platform technologies, and including Crystal Report and Microsoft SSRS
- Helped projects and units within CalSTRS to create reporting applications that integrate various types of reports using data mined and aggregated from multiple sources

The Benefits

- Standardized and mature enterprise reporting framework
- Faster creation of high quality reports using distinct datasets
